---The MAILING DATE of this communication appears on the cover sheet beneath the correspondence address---

Period for Response

A SHORTENED STATUTORY PERIOD FOR RESPONSE IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a response be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for response specified above is less than thirty (30) days, a response within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for response is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to respond within the set or extended period for response will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Status

- ☒ Responsive to communication(s) filed on _____.
- ☒ This action is **FINAL**.
- ☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 1 1; 453 O.G. 213.

Disposition of Claims

- ☒ Claim(s) 1-17 is/are pending in the application.
Of the above claim(s) _____ is/are withdrawn from consideration.
- ☐ Claim(s) _____ is/are allowed.
- ☒ Claim(s) 1, 4, 6-17 is/are rejected.
- ☒ Claim(s) 2, 3, 5 is/are objected to.
- ☐ Claim(s) _____ are subject to restriction or election requirement.

Application Papers

- ☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.
- ☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.
- ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- ☐ The specification is objected to by the Examiner.
- ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119 (a)-(d)

- ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
 - ☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been received.
 - ☐ received in Application No. (Series Code/Serial Number) _____.
 - ☐ received in this national stage application from the International Bureau (PCT Rule 1 7.2(a)).

*Certified copies not received: _____

Attachment(s)

- ☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____
- ☒ Notice of References Cited, PTO-892
- ☐ Notice of Draftsperson's Patent Drawing Review, PTO-948
- ☐ Interview Summary, PTO-413
- ☐ Notice of Informal Patent Application, PTO-152
- ☐ Other _____

Office Action Summary

Art Unit: 2603

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1, 4, 8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art in view of Tanaka(5,636,243).

Claim 1 is rejected because the admitted prior art teaches a CDMA mobile communication system with a pilot channel that transmits a pilot signal in spread spectrum formation and traffic channel transmit units that respectively transmit data signals while the pilot signal is transmitted(Fig. 1 and Fig. 2). What the admitted prior art does not teach is a pilot signal that is intermittently transmitted. Tanaka's invention deals with direct communications between mobile stations in which he discloses a method wherein a base station transmits an intermittent control signal, in a predetermined control channel(TDMA slot once every 100 msec, Fig. 3), to terminals located within the service area. These terminals communicate with each other by transmitting control and response signals intermittently to establish synchronization therebetween(summary of the invention, also see Fig. 12). In this way less power is expended during the establishment of synchronization. It would have been obvious to one of ordinary skill in the art to incorporate this

Art Unit: 2603

same concept in the admitted prior art i.e. intermittent transmission of a pilot signal by a CDMA transmitter for the purpose of reducing power consumption.

Claim 4 is rejected because the admitted prior art teaches a CDMA receiver (Fig. 2) comprising: a pilot channel receiver unit which demodulates pilot signals in spread spectrum formation by transmitters while digital signals are sent in respective traffic channels. What the admitted prior art does not teach is the demodulation of intermittently transmitted pilot signal and the detection from the pilot signal a timing for a traffic channel demodulation. Tanaka discloses an intermittent receiving operation whereby the mobile terminal intermittently receives the control signal (Fig. 11). The reasons for combining Tanaka with the admitted prior art are obvious in light of the above rejections. The motivation being that the receiver will require the intermittent timing signal for the purpose of intermittently synchronize mobile unit in order to demodulate the traffic signal.

Claim 8 is rejected for the same reasons as claims 1 and 4 and in addition to the fact that it is well known in the art that a CDMA mobile communications system is made up of plural base stations and mobile units in order to maintain communication over a wide geographic area. (cells)

Claim 9 and 14 are rejected because the use of offsets is taught by the admitted prior art.

Claims 10-12, 15-17 are rejected because it is well known in the art that the offset time can be changed depending on the extent to which it is practicable for a base station to be distinguished itself from other base stations.

Art Unit: 2603

Claim 13 is rejected because the admitted prior art teaches a CDMA mobile communication method comprising steps of: transmitting pilot signals in spread spectrum formation, the admitted prior art does not teach the demodulation of intermittently transmitted pilot signals nor the detection from timing signals a timing for traffic channel demodulation. The reasons for rejecting steps (b) and (c) are discussed in the rejections of claims 1 and 4.

3. Claim 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Tunica as applied to claim 4 above, and further in view of Marchetto et al(5,414,734).

Claims 6 and 7 are rejected because Marchetto teaches a receiver circuitry that uses the pilot signal to demodulate data affected by fading and interference and compensates for the undesired effects.(see Fig 3@ 96, 100, 92 and 104 also see abstract). It would have been obvious to one of ordinary skill in the art to incorporate this circuitry in the admitted prior art for the purpose of enabling channel response estimates to be made. The motivation would be to compensate for multi-path interference.

Allowable Subject Matter

4. Claim 2, 3, 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2603

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Vanderpuye whose telephone number is (703) 308-7828. The examiner can normally be reached on M-F from 6:30am to 5:00pm.

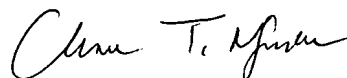

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doug Olms, can be reached on (703) 305-4703. The fax phone number for this Group is (703) 305-9509.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
